MK Products Cobramatic® Pro Series Push-Pull Wire Feed System Delivers Advanced Connectivity

Irvine, CA - MK Products introduces the Cobramatic Pro Series wire feed cabinet, with advanced connectivity that allows for universal input power from all welding power supplies.

With the same dedicated function and performance as the original Cobramatic, the Cobramatic Pro Series cabinet has a structural design that allows for smaller compact size. This provides greater accessibility to tighter, more confined spaces (i.e. through ship portholes). Half the weight of the original, the Pro Series cabinet is rugged enough for all weather environments.

The Cobramatic Pro Series offers classic MK Products or Euro-style gun connections. A bright front panel LED allows for visibility in the darkest shops, and displays Wire Feed Speed and Welding Arc Voltage.

Established in 1966, MK Products is the original inventor of Cobramatic push-pull wire feed technology and is recognized worldwide as the leader of aluminum welding systems.

MK Products also manufactures orbital tube welding systems for everyday and exotic alloys and Aircrafter™ table-top rotary positioners. ###
